

GreenAI Energy Report Card

Evaluating Energy Use in AI Training and Deployment to Guide Cost Decisions

Energy Cost Report

EXECUTIVE STAKEHOLDER FOCUS

COST OPTIMIZATION GUIDE:
Assess model energy and compute costs.

PUBLIC ENGAGEMENT FOCUS

TRANSPARENCY & TRUST:
Build public confidence in AI development.

PROBLEM: THE HIGH ENERGY USE OF AI TRAINING

Configure Training

Select model, dataset, and hyperparameters before launching training.

Live Monitoring

Track power, temperature, loss, accuracy, and energy while training runs. Values update automatically from backend status polling with real NVML telemetry.

Report Card

Review final run metrics with real backend values and energy-per-epoch chart.

PRIMARY GREEN AI OBJECTIVES

GUIDE AI MODEL DECISIONS

FOR EDUCATION

PUSH FOR ENERGY USE TRANSPARENCY

FUTURE DASHBOARD: TOWARDS ACCOUNTABLE AI

ADDITIONAL METRICS TO BE ADDED:

WATER CONSUMPTION

LIFE-CYCLE IMPACT

ETHICAL OPTIMIZATION

ENVIRONMENTAL IMPACT AWARENESS
